TITLE : ORGANIC ELECTROLUMINESCENT
ELEMENT AND DISPLAY DEVICE
USING THE SAME

一般式(1)

ABSTRACT : PROBLEM TO BE SOLVED: To provide an organic electroluminescent element which makes an enhanced luminous brightness and good durability compatible and a display device having a long lifetime and a high luminous brightness by using a silicon compound of a specific structure as a host compound for phosphorescence or using the silicon compound as an electron transport material (hole blocker).

SOLUTION: The organic electroluminescent element contains at least one of the compounds expressed by Formula (1) given in Synopsis 1.
